

State and Federal Programs

State & Federal Programs is part of the Student, Family, & Community Services Department of Northside Independent School District within the Division of Curriculum and Instruction. We provide programs and services to enhance student achievement, targeting students who may be at risk of not achieving or dropping out of school. We also provide support and classes to engage parents in becoming partners in their child's education. Our goal is to support students, parents, and educators so students are able to reach their goals!
